

WHAT IS CLAIMED IS:

1 1. A box comprising:

2 a body with parallel front and rear sides, and parallel first and second end sides, each
3 having a width and interconnecting said front side and said rear side;

4 a bottom side being formed from a front bottom flap extending from said front side, a
5 rear bottom flap extending from said rear side, a first bottom end flap extending from said first
6 end side and a second bottom end flap extending from said second end side, said bottom flaps,
7 each of said bottom flaps folded along a crease line and cooperating with the other said bottom
8 flaps to form said bottom side; and

9 a top side being formed from a front top flap extending from said front side, a rear top
10 flap extending from said rear side, a first top end flap extending from said first end side and a
11 second top end flap extending from said second end side, each of said top flaps folded along a
12 crease line and cooperating with the other said top flaps to form said top side;

13 said rear top flap, said first top end flap and said second top end flap having perforations
14 along their respective crease lines;

15 said front side including perforations defining a front side tear-out segment disposed in
16 the front side extending to the crease line defining said front top flap; and

17 said front top flap having perforations extending from said front side tear-out segment
18 along its crease line.

1 2. The box of claim 1 further comprising an opening aperture disposed in said front side to
2 allow access to the front side tear-out segment.

1 3. The box of claim 1 further comprising at least one front side perforation extending from

2 said perforations extending along the crease line defining said front top flap into said front side.

1 4. The box of claim 1 wherein said rear side comprises perforations defining a rear side
2 tear-out segment disposed in the rear side extending to the crease line defining said rear top flap;
3 and
4 said rear top flap having perforations extending from said rear side tear-out segment
5 along its crease line.

1 5. The box of claim 4 further comprising an opening aperture disposed in said rear side to
2 allow access to the rear side tear-out segment.

1 6. The box of claim 4 further comprising at least one rear side perforation extending from
2 said perforations extending along the crease line defining said rear top flap into said front side.
